

NWEA Growth Benchmark

- Student Growth Percentile (SGP) is a growth data point where students are measured against their academic peers from across the country.
- A student's academic peer are others who have scored in similar RIT bands on previous NWEA tests.
- A student who scores in the 50th SGP or better is considered to be **growing** at an average or normal pace.
- With a large enough sample size, one can expect about half of students to be above and half to be below the 50th SGP.

2022 Spring NWEA Math SGP Results

Percent of students at the 50th SGP or Better

| Grade | Subject | Spring 2022 Overall Growth | Female | Male | SE=No | SE=Yes | ED=No | ED=Yes | African-American | Hispanic | Two or More | White |
|-------|-----------|----------------------------|--------|-------|-------|--------|-------|--------|------------------|----------|-------------|-------|
